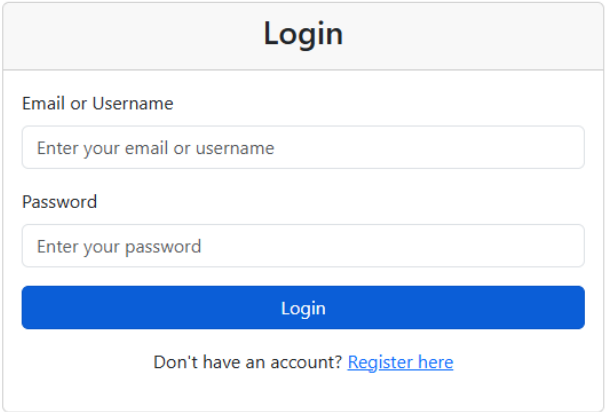
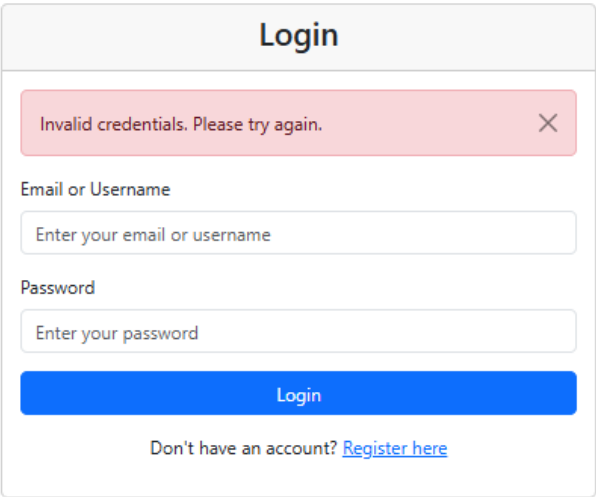
User Guide

1-Login Page

The customer/admin logs in to the web application after registering for an account. If the account is admin, the user gets directed to the admin panel. Otherwise, if the user is a customer, then the user's dashboard appears.

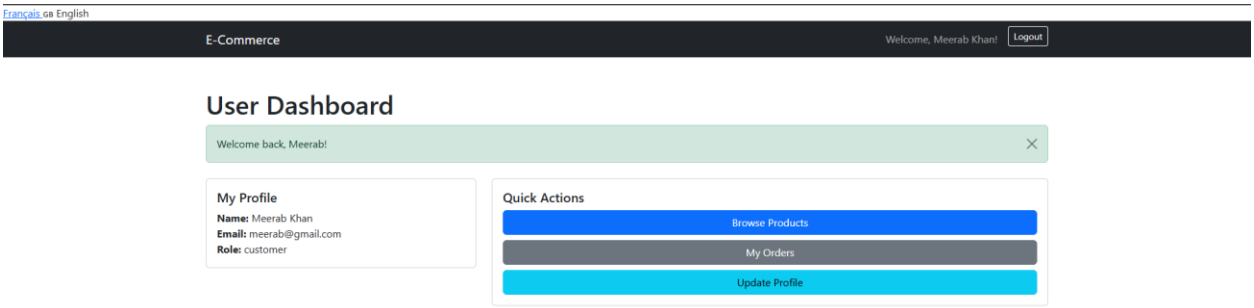


If your credentials are invalid, the alert will show.



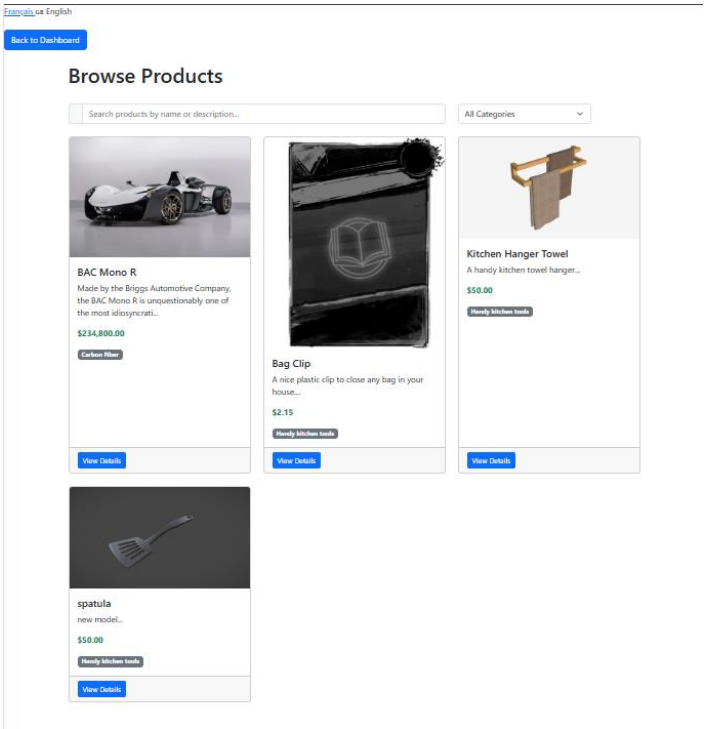
2- User Dashboard Page

When a customer successfully logs inside the web application, the user's dashboard appears.



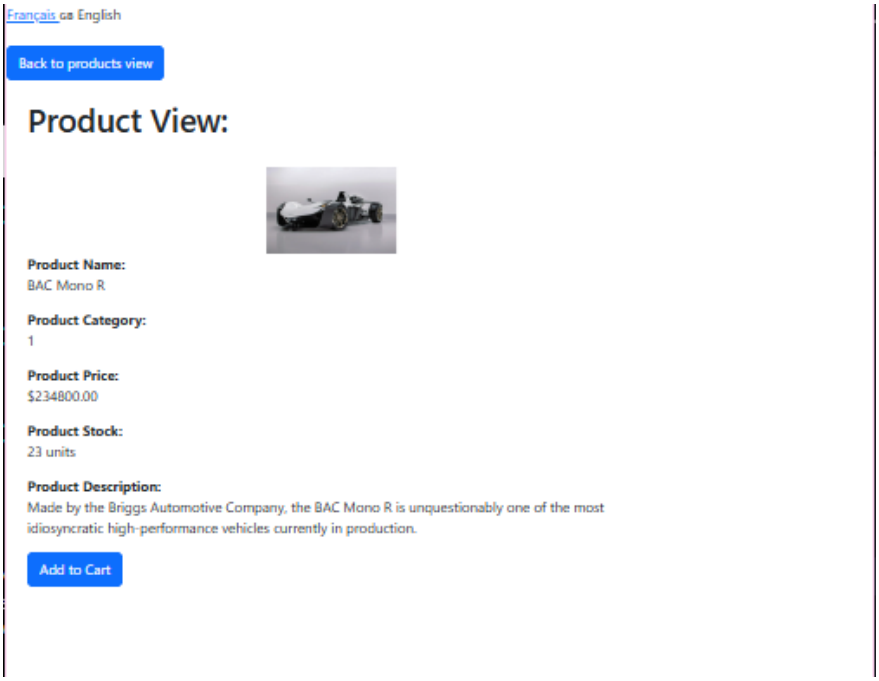
3- Browse Product Page

When the Browse Product button is clicked, the customer can search, filter, and view details of the product.

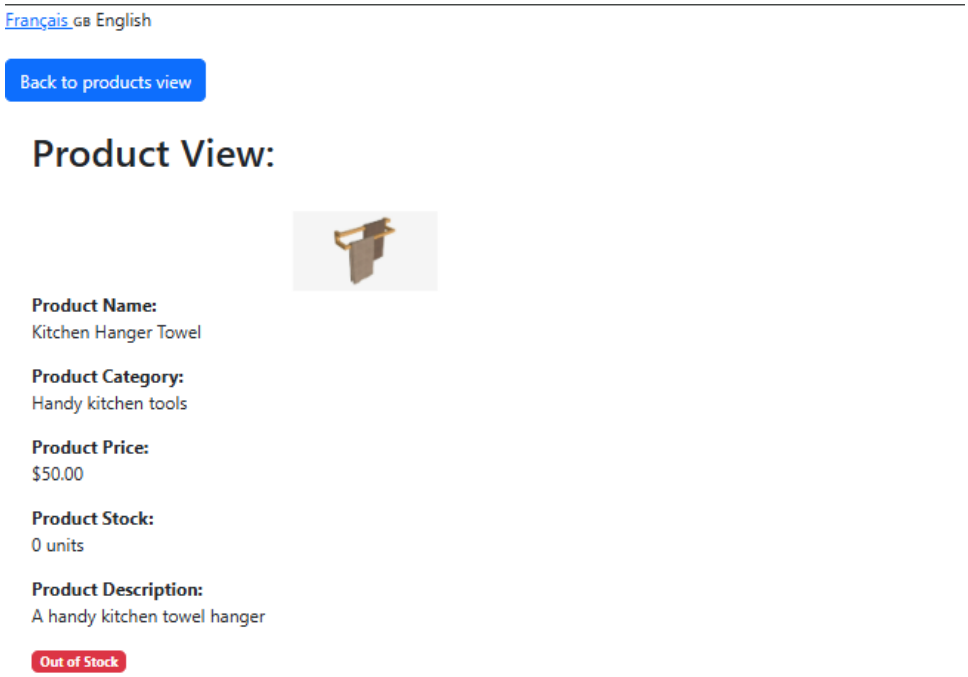


4- Product Detail Page

When the view details button is clicked, the product details page appears, where you can add to cart the product.



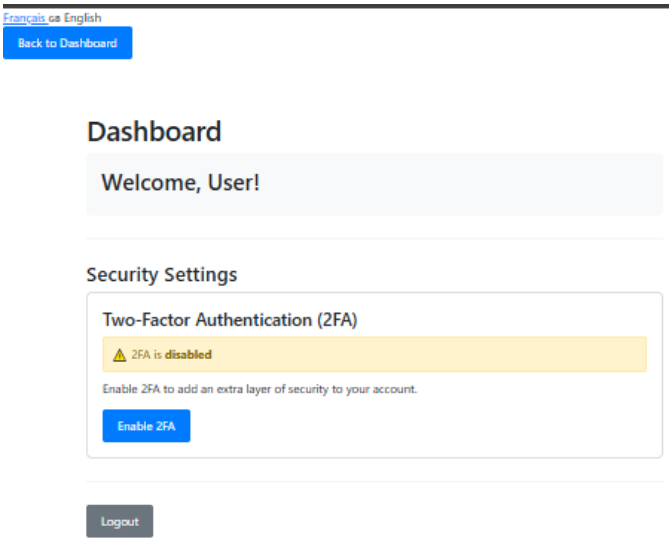
If a product is out of stock, a badge will show the customer's side view.



5- Update Profile Page

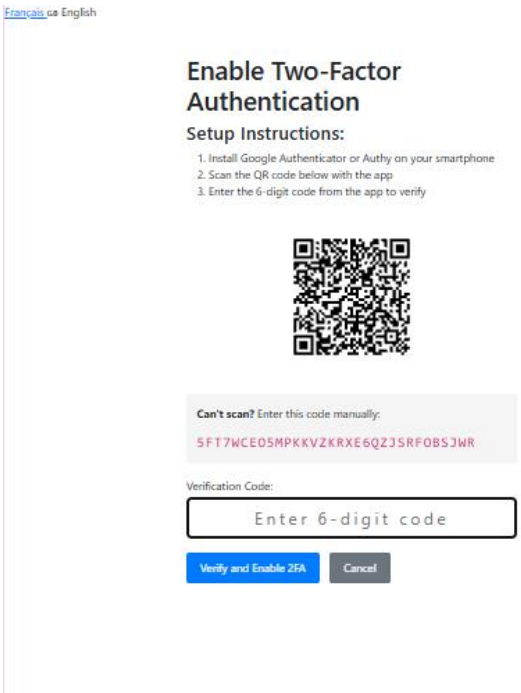
For customers, if you click on the update profile button in the user dashboard page, you will get to the 2-factor authorization setup page, which adds extra security to your account.

You can disable or enable the 2fa setup upon clicking on the button disable/enable button.

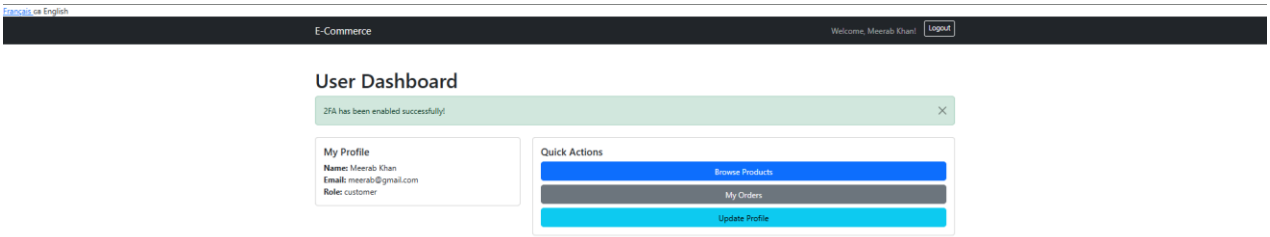


6- QR code

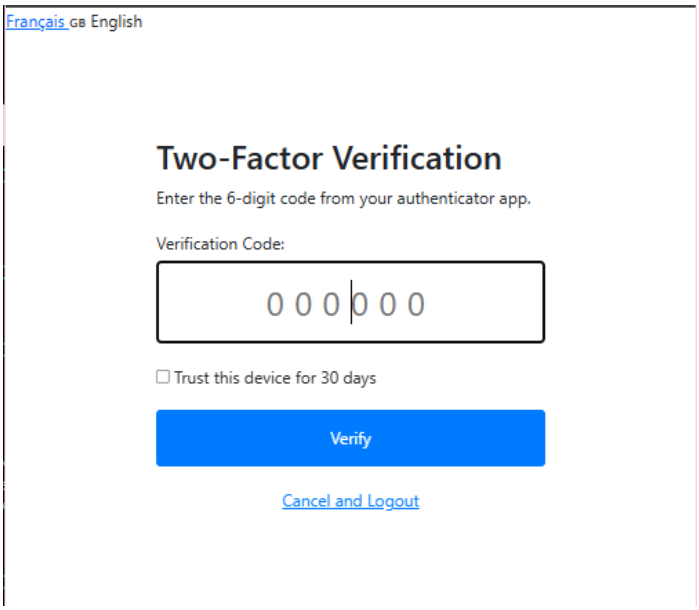
If the enable button is clicked, the user scans the QR code or manually enters the code inside an authenticator app on your phone. Then you will be registered to the app, and you will need to enter the 6-digit code that gets generated on your authenticator app.



Success message displays on the user's dashboard page, when the 2fa setup was successful.



Now every time you log in, you will have to enter the 6-digit code from your phone.



However, if you enter the code and click on the checkbox next to "Trust", you won't need to add your 2fa code for 30 days, whenever you log in.

7- My Order Page

After clicking on My Orders button, in the user's dashboard, you will get the items you added to the cart page.

Français GB English

Back to Products

My Order

Product	Price	Qty	Total	Actions
BAC Mono R	$234,800.00	1	**$234,800.00**	+ −
Bag Clip	$2.15	12	**$25.80**	+ −

Total: $234,825.80

Proceed to Checkout

Here, you can add and reduce quantity, upon clicking the + and – buttons. The total price will change as you add and reduce quantity.

8-Checkout Page

After clicking Proceed to Checkout, the checkout page gives a order summary and the total.

Français GB English

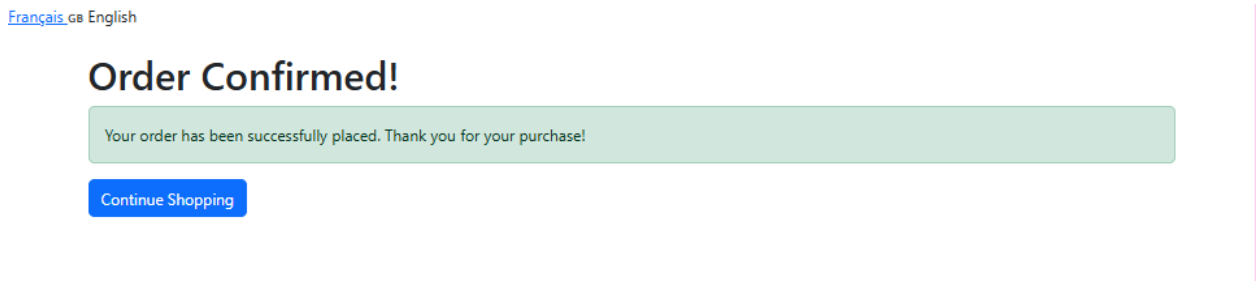
Checkout

Product	Price	Qty	Total
BAC Mono R	$234,800.00	2	$469,600.00

Total: $469,600.00

Confirm Purchase

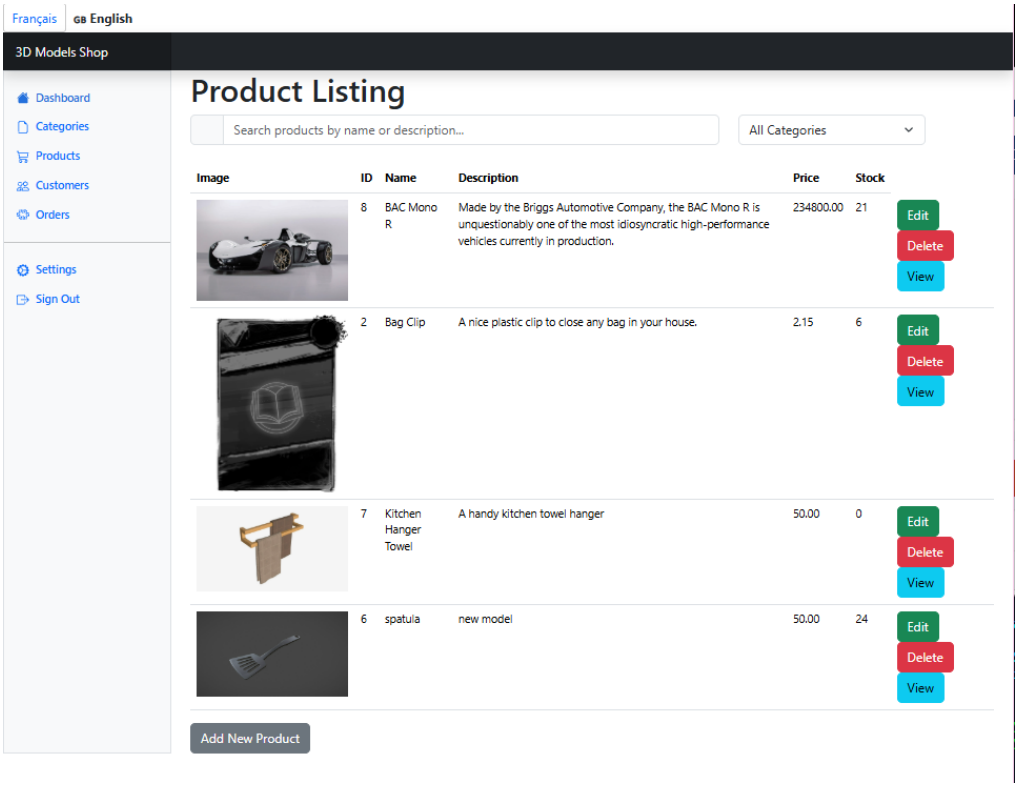
After clicking the Confirm Purchase button, you get a confirmation message that you have successfully completed the purchase.



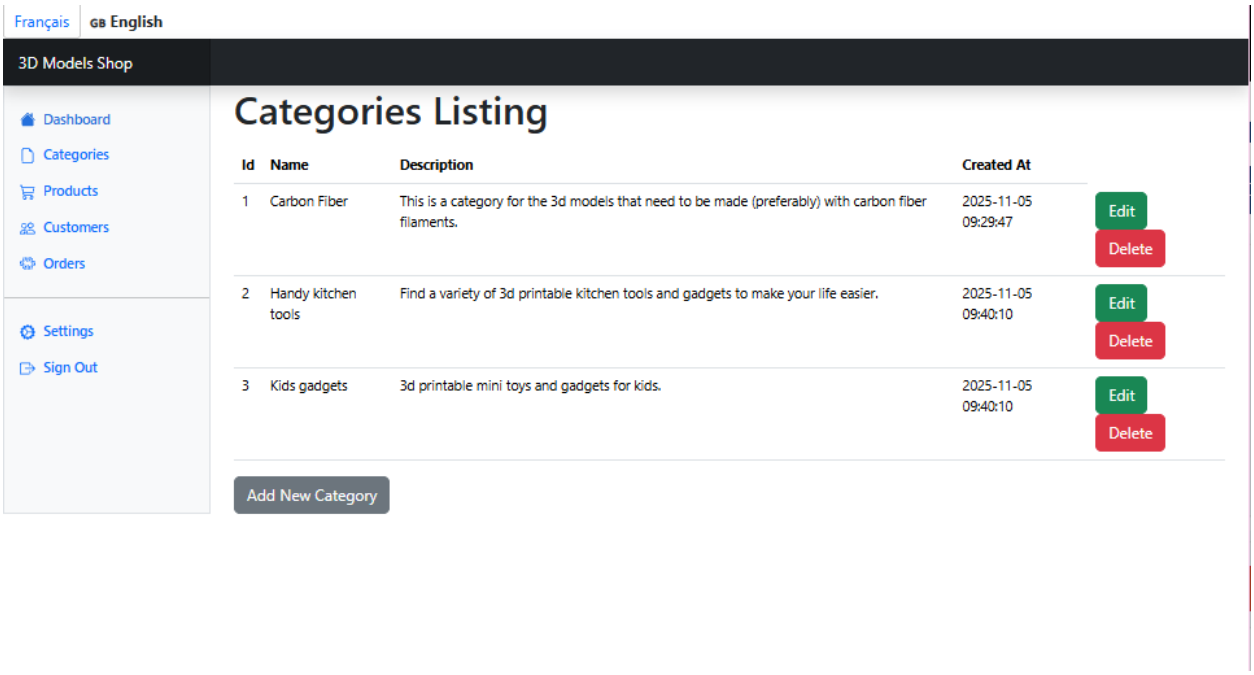
9- Admin Dashboard Page

When an admin successfully logs inside the web application, the admin dashboard appears. The admin can add, create, delete, view, and read products and categories upon clicking the buttons related to each page.

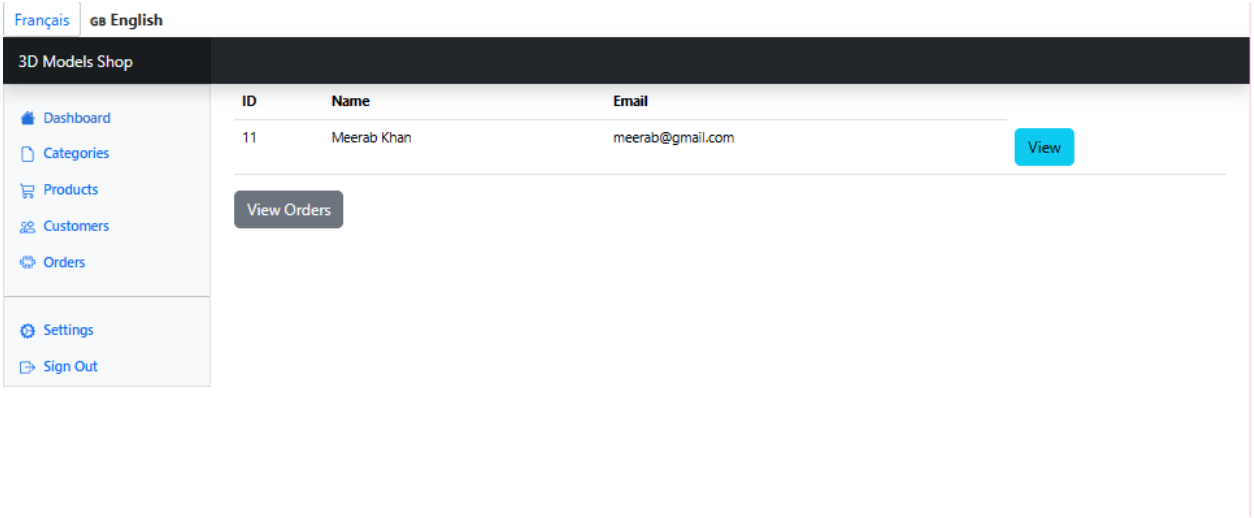
10 – Products page



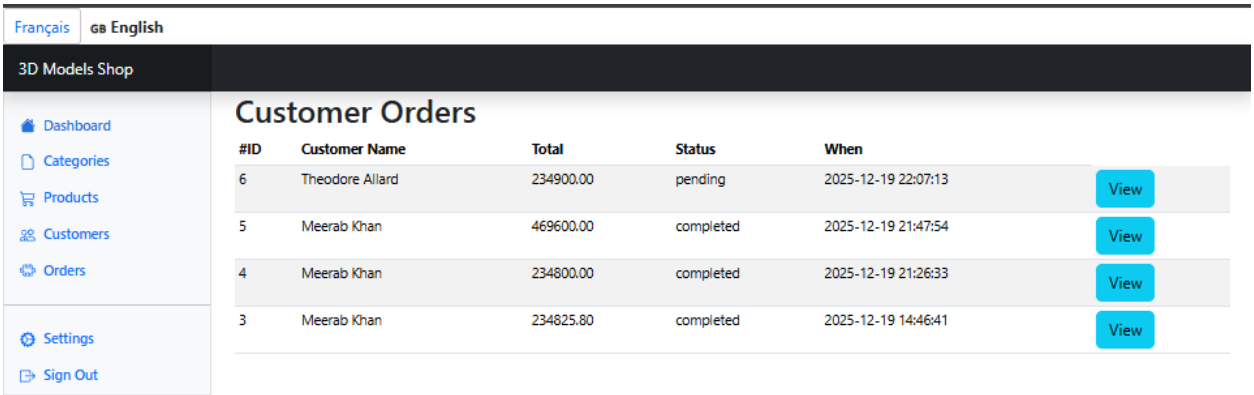
11. Categories page



12. Customers Page



13. Orders Page



3-Settings Page

If you click on the settings page in the admin panel, you get to the 2-factor authorization setup, which adds extra security to your account. You can disable or enable the 2fa setup upon clicking on the button disable/enable button.
