3D Models App – User Guide

Mariam Salim #6229528

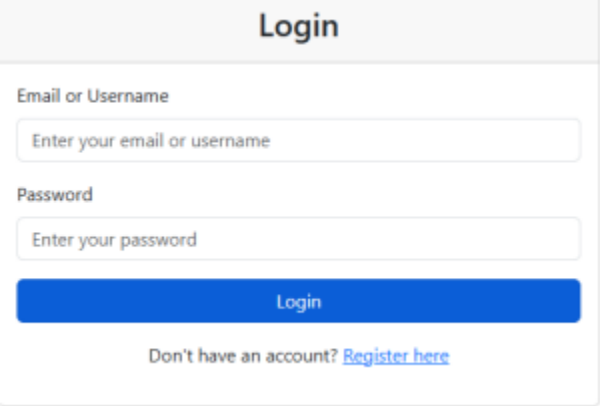
Meerab Khan

User Guide

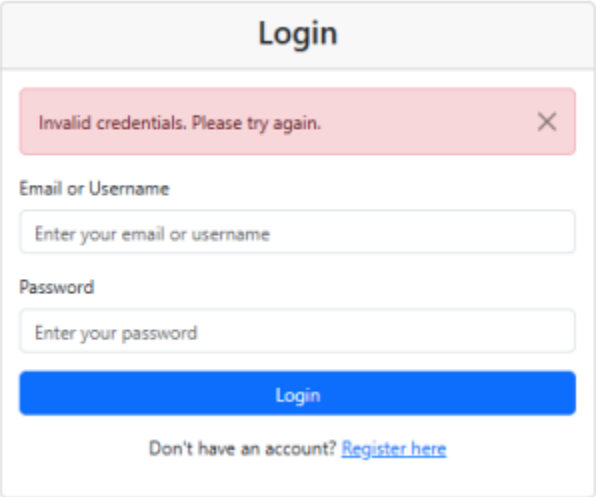
1. Login Page

The customer/admin logs in to the web application after registering for an account.

Admins are redirected to the admin panel, customers to the dashboard.

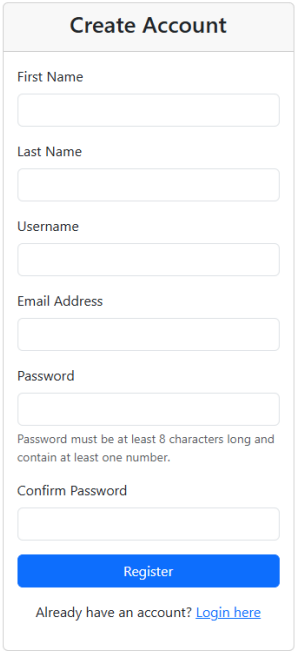


Invalid credentials will show an alert.



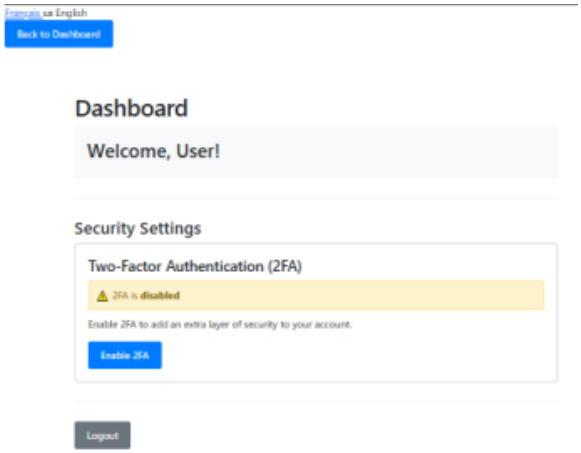
2.Customer Registration

New customers can create an account to access the system and shop. They need to enter their information. Invalid data will show errors. To get to the registration page, click on the link “Register here” under the login panel

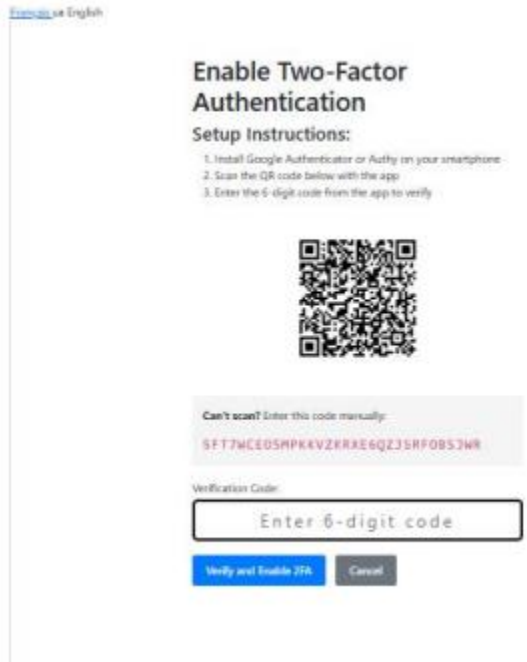


3. Update Profile Settings page

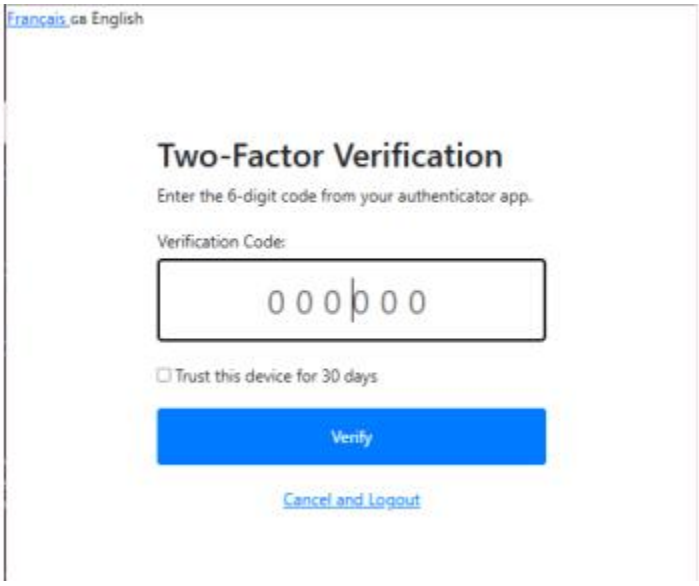
Customers can access 2-factor authentication (2FA) setup. You can disable or enable 2fa upon clicking on the disable/enable button. Also, by clicking on the blue button “Back to Dashboard” they go to their respective dashboard (admin or customer).



4- QR code If the enable button is clicked, the user scans the QR code or manually enters the code inside an authenticator app on your phone. Then you will be registered to the app, and you will need to enter the 6-digit code that gets generated on your authenticator app.



Now every time you log in, you will have to enter the 6-digit code from your phone.

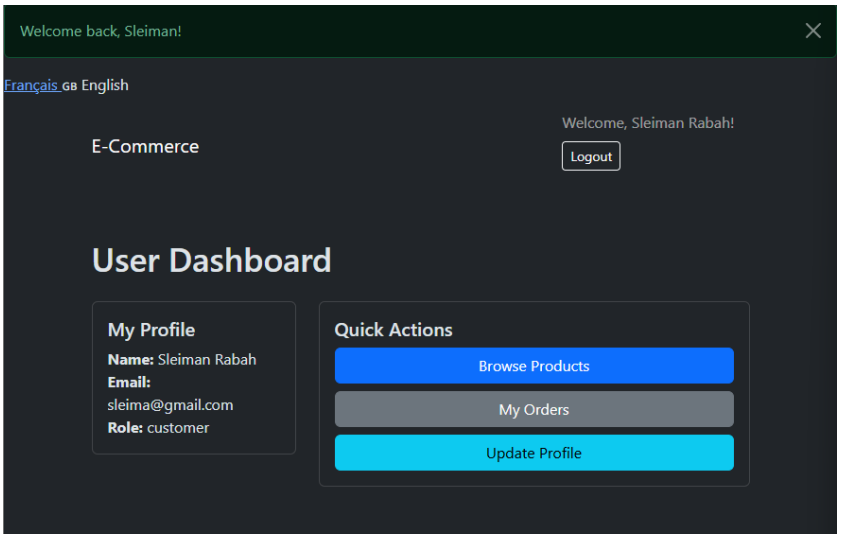


However, if you enter the code and click on the checkbox next to “Trust”, you won’t need to add your 2fa code for 30 days, whenever you log in

Customer Side

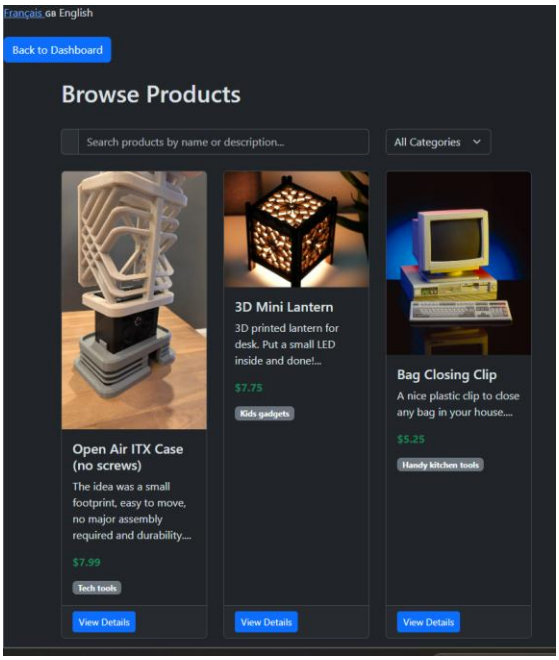
1. User Dashboard Page

When a customer successfully logs inside the web application, the user's dashboard appears.



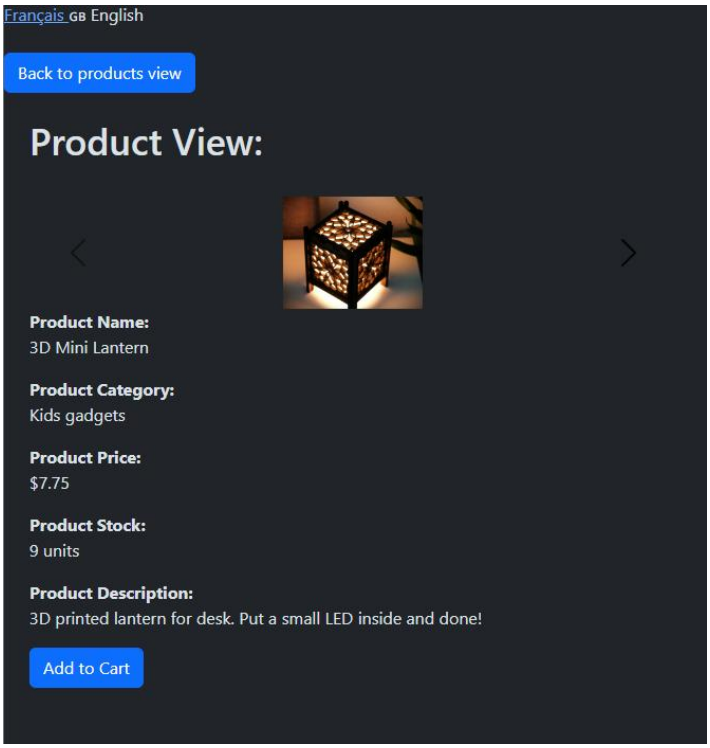
2. Browse Product Page

When the Browse Product button is clicked, the customer can search, filter, and view details of the product.

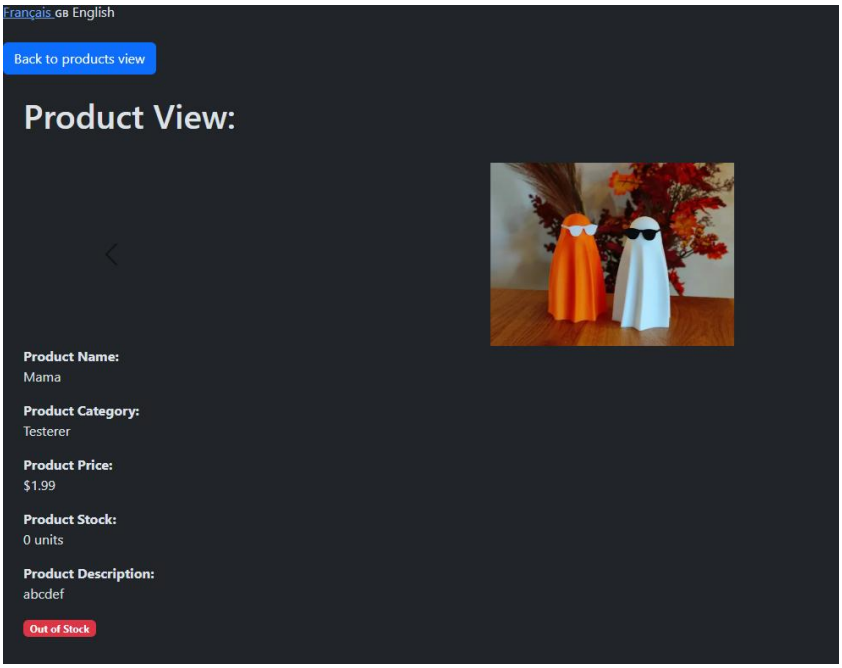


3. Product Detail Page

When the view details button is clicked, you can see the product images in a carousel, you can see the product name, price, description, category and you can add to cart the product.

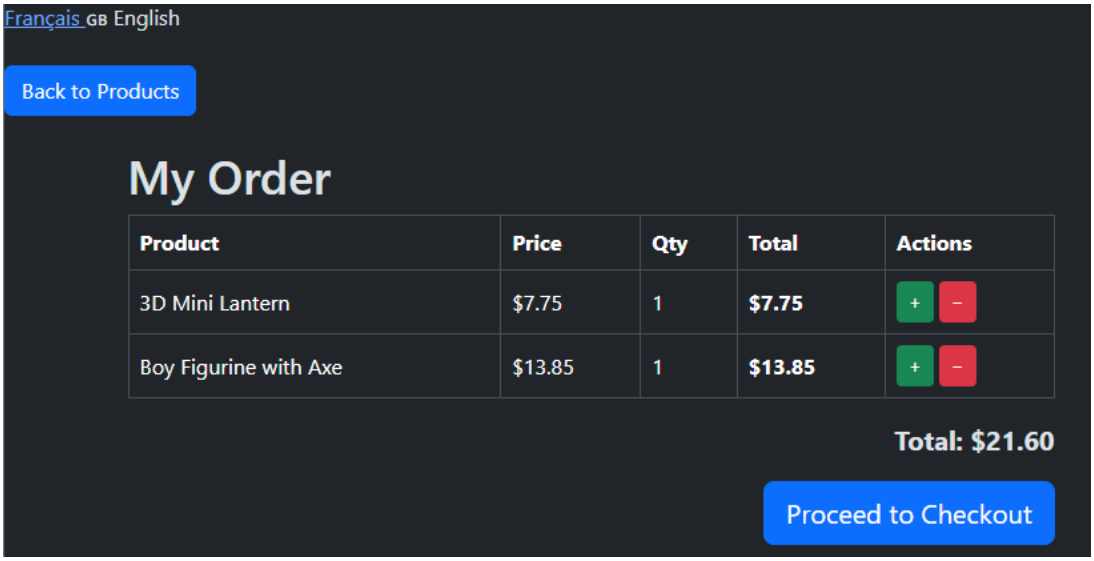


If a product is out of stock, a badge will show the customer's side view.

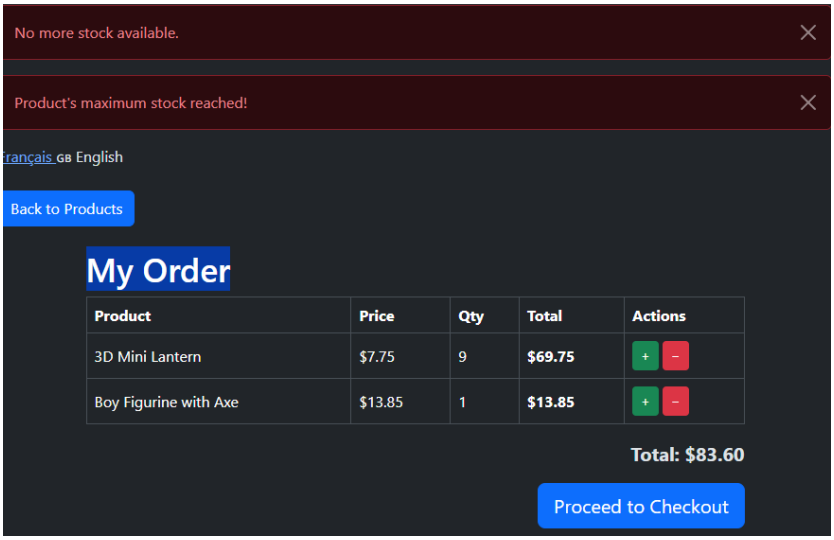


4-My Order Page

After clicking on My Orders button, in the user's dashboard, you will get the items you added to the cart page. Here, you can add and reduce quantity, upon clicking the + and – buttons. The total price will change as you add and reduce quantity.

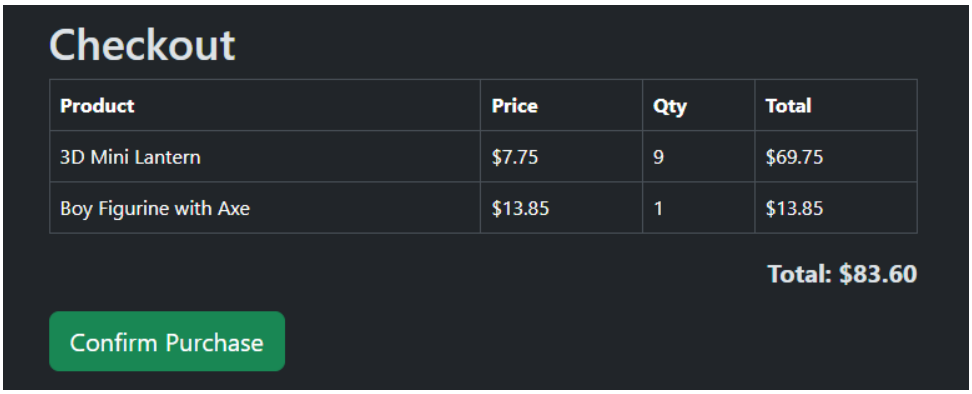


An error message will appear if you exceed the stock.

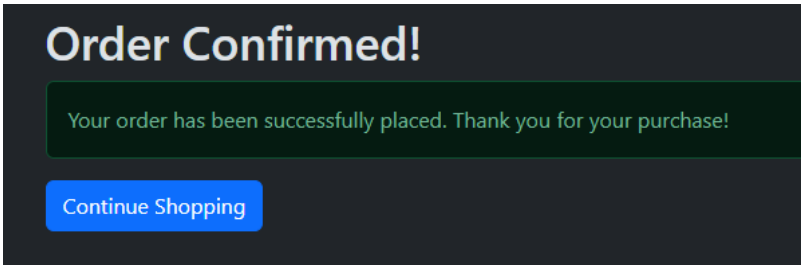


5-Checkout Page

After clicking “Proceed to Checkout”, the checkout page gives a order summary and the total.



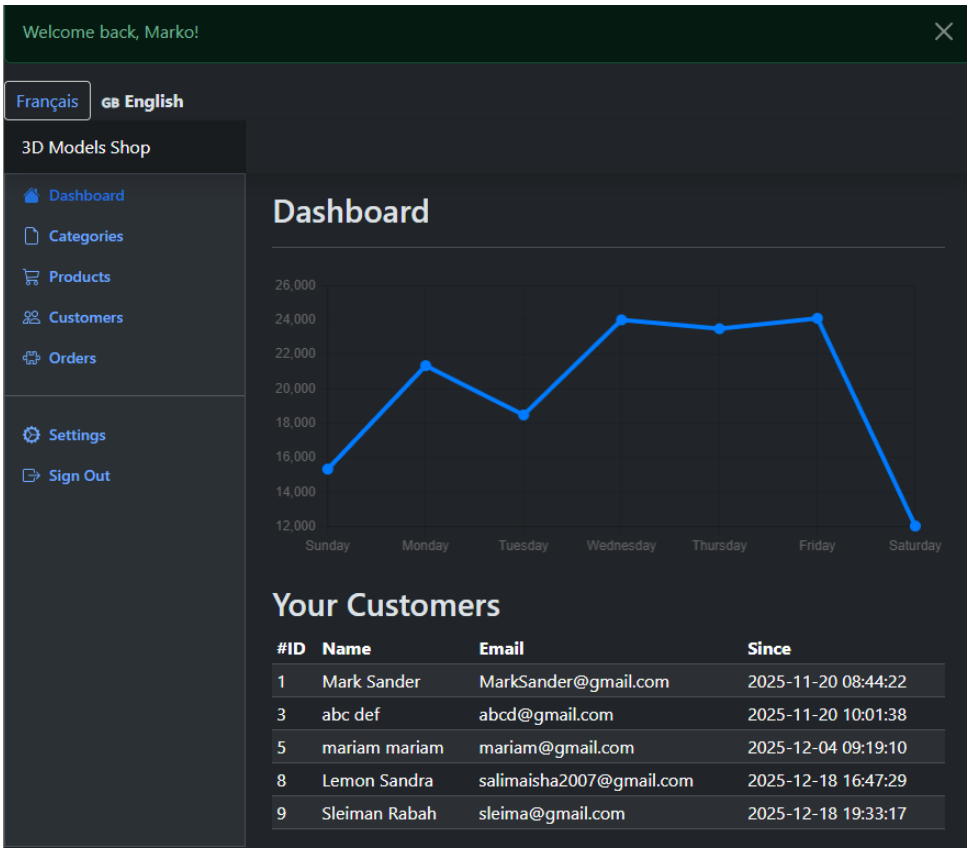
After clicking the Confirm Purchase button, you get a confirmation message that you have successfully completed the purchase.



Admin Side

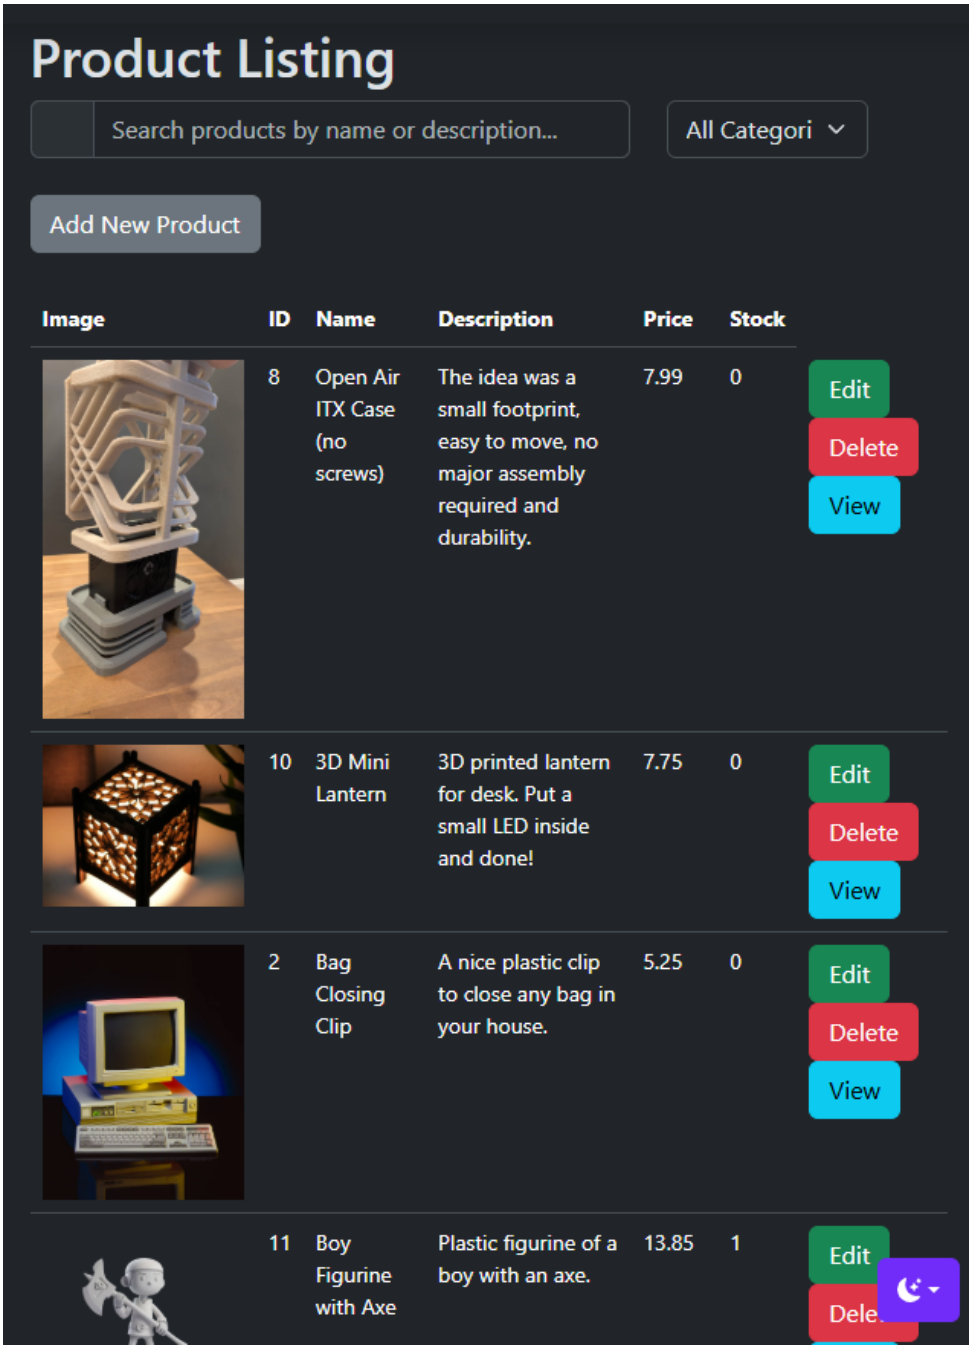
1 – Admin Dashboard Page

You can see the list of all customers ordered by most recent.



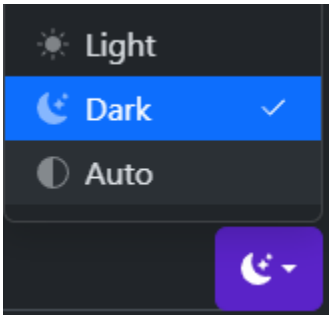
2 – Products page

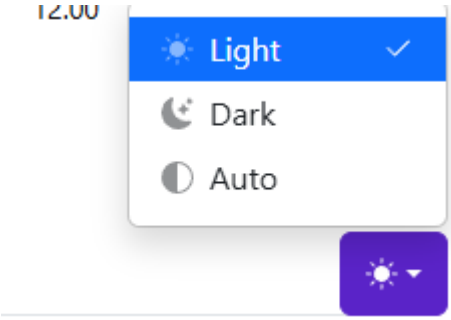
When you click “Products” in the sidebar, you get to the products page, where you can see all the products and their details, you can edit them and delete them. You can search products and filer by category.

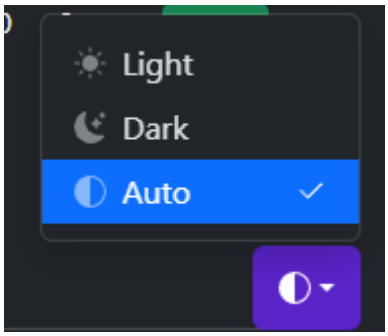


3 – Dark/Light mode

When you see this purple button, you can change the theme to dark or light or keep the default theme.

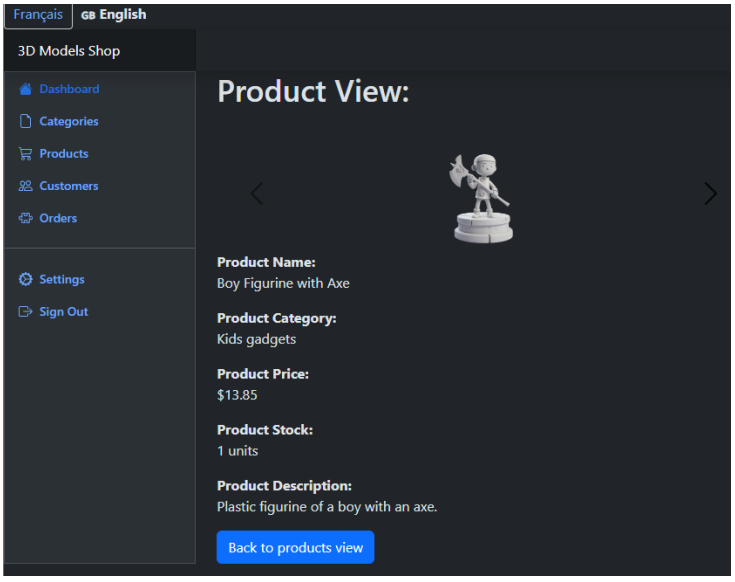






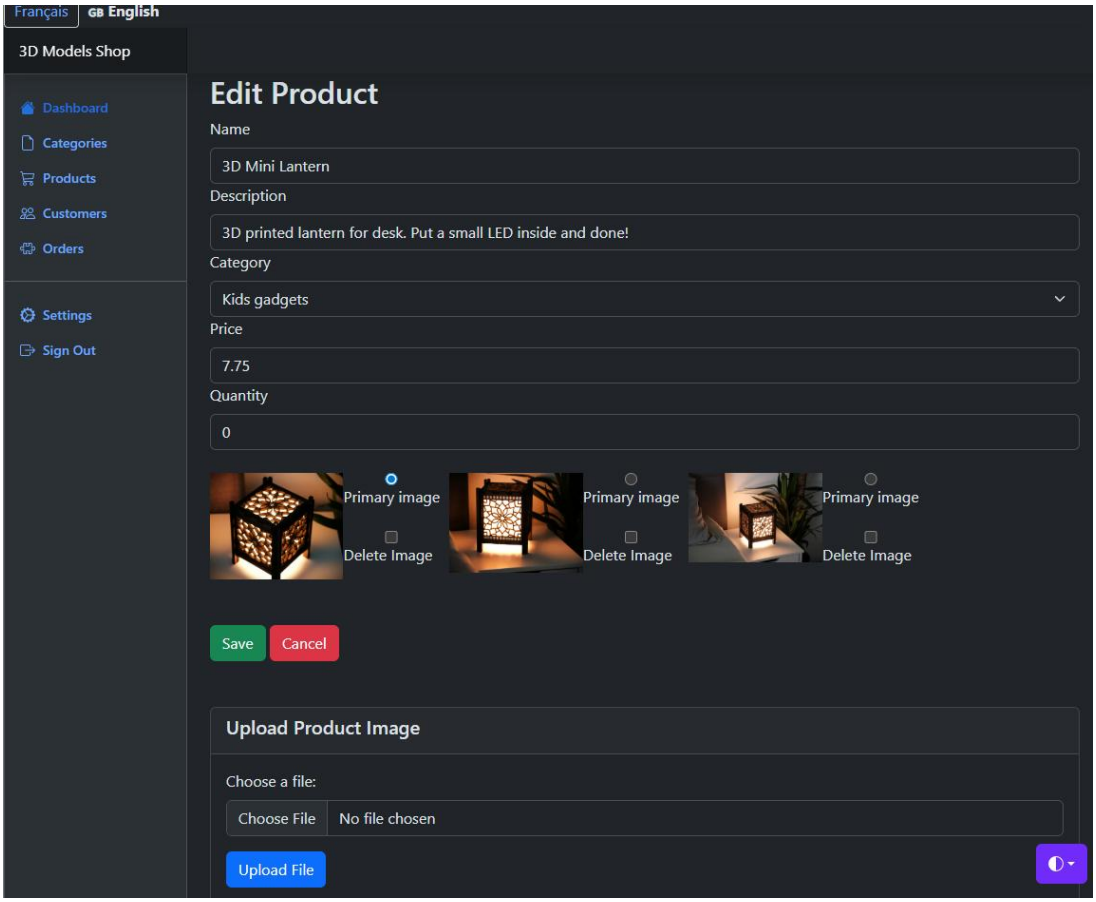
4 – View product

When you click on a product's "View" button, you get to a page that displays the product's details and its images in a carousel.

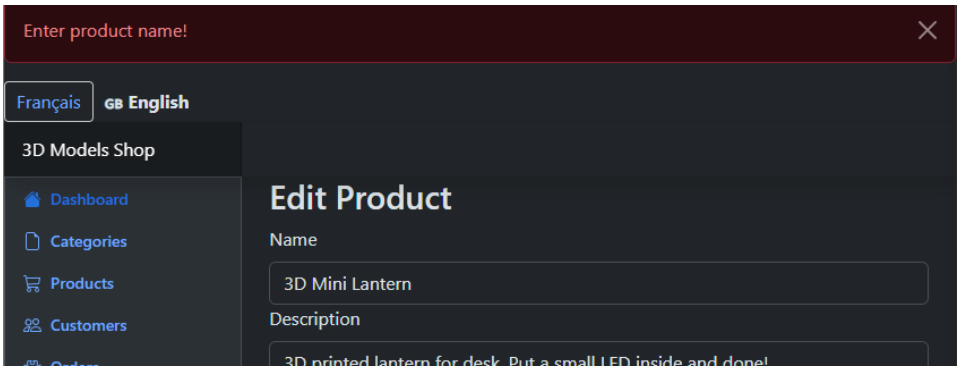


5 – Edit product

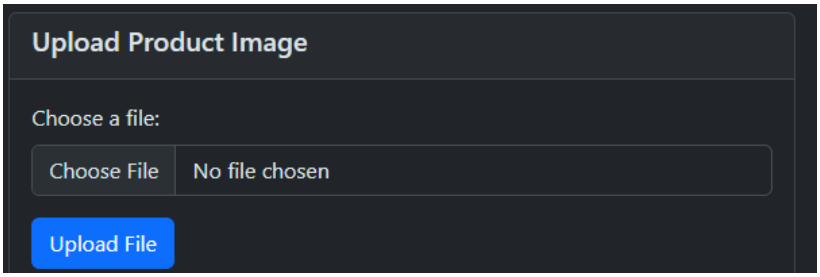
When you click on a product's "Edit" button, you get to a page that displays the product's information that you can edit. You can edit the primary image of the product, the stock, the name, the category, the price and description. You can remove an image by checking the checkbox "Delete image" to the right of the image. Click save to confirm edit or cancel to go back to the products view.



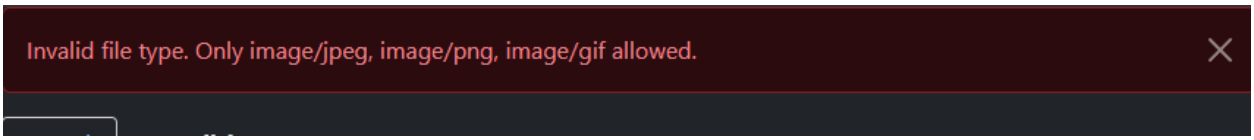
An error message will appear if you enter invalid data and press save.



There is a section in the edit page to add new images to the product:

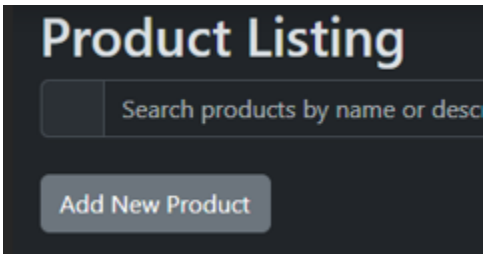


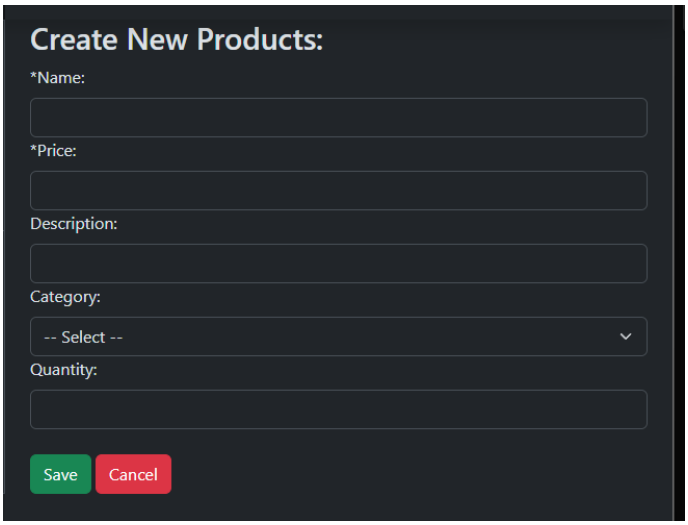
An error message will appear if you enter a wrong file:



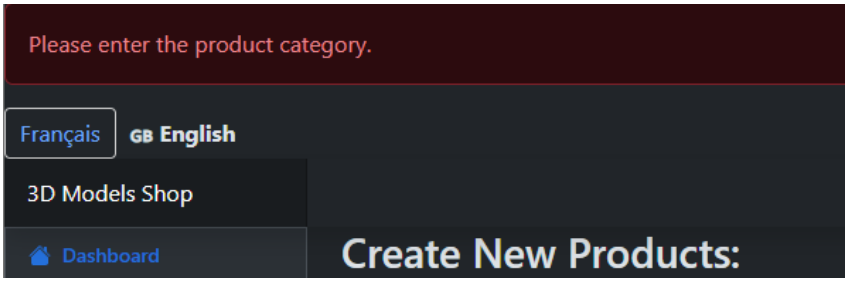
6 – Product creation

In the products list view, if you click on “Add New Product” button, you get redirected to a creation page:

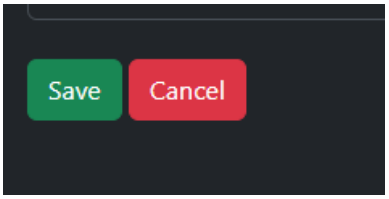




An error message will appear if you enter invalid/missing data:

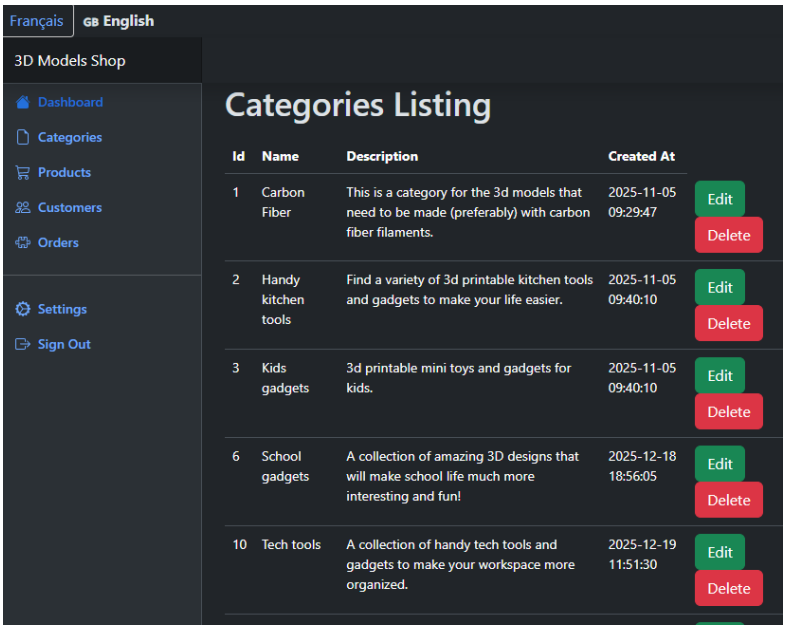


When you entered the new product's information, press "Save", or "Cancel" if you want to cancel the operation.



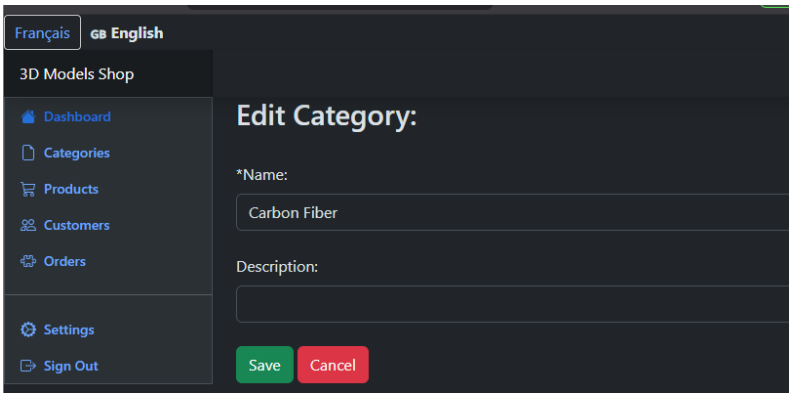
7 – Categories page

When you click "Categories" in the sidebar, you get to the products page, where you can see all the categories and their details, you can edit them and delete them.

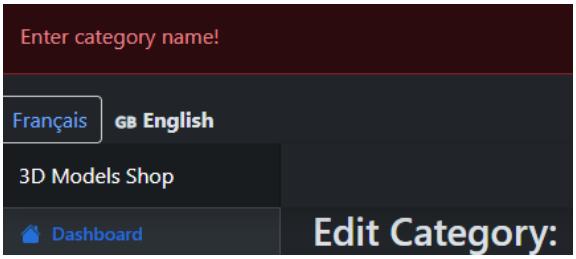


8 – Edit category

When you click on a product's "Edit" button, you get to a page that displays the category's information that you can edit.

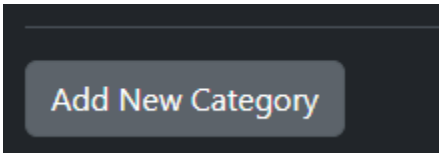


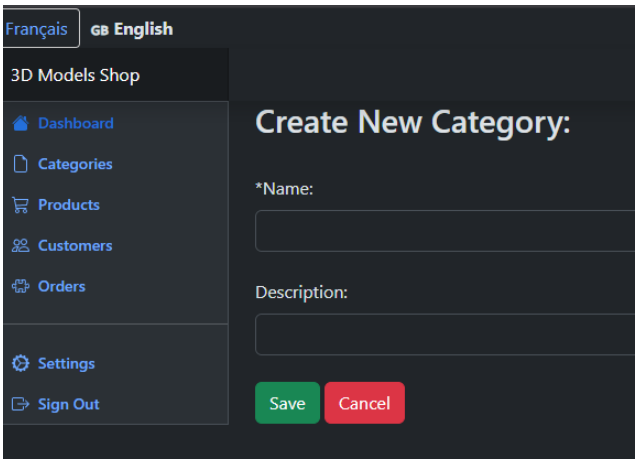
An error message will appear if you enter invalid data and press save (if name is empty). If you do not enter a new description, the old one stays.



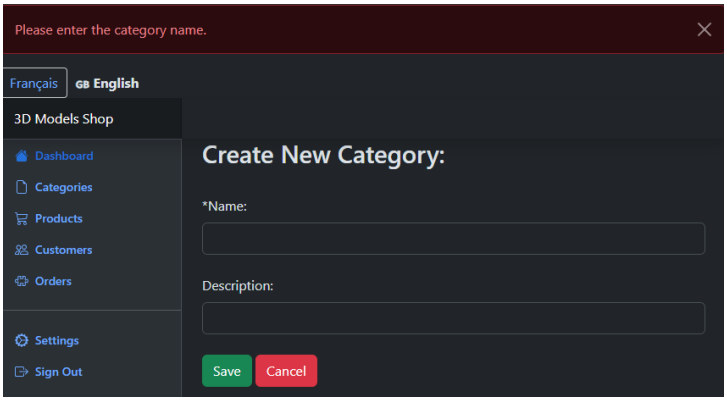
9 – Category creation

In the categories list view, if you click on "Add New Category" button after the categories:





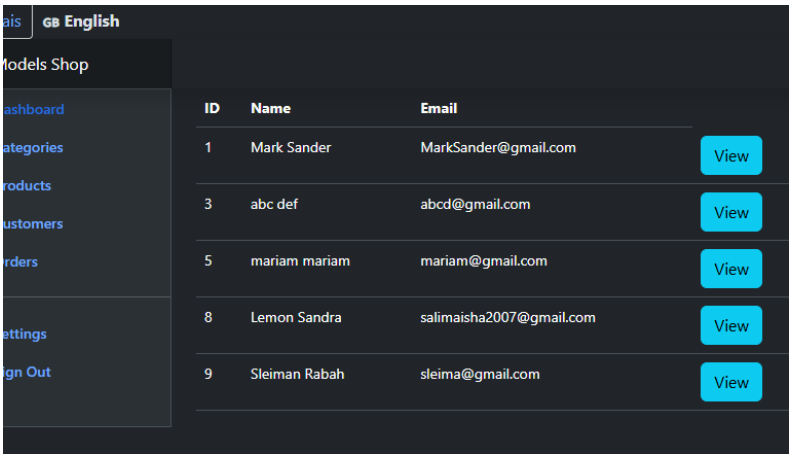
An error message will appear if you enter invalid/missing data:



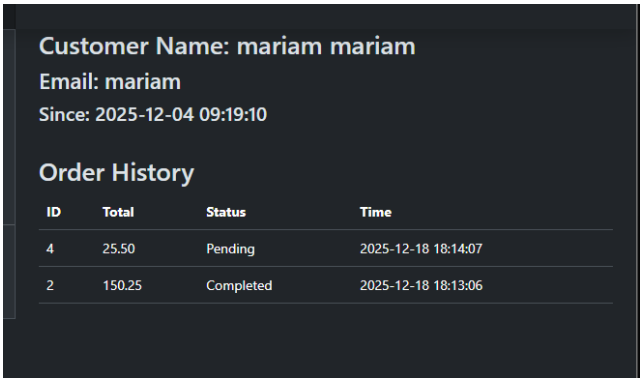
When you entered the new category's information, press "Save", or "Cancel" if you want to cancel the operation.

10 – Customers page

When you click “Customers” in the navigation bar, you get to the customer summary page. All the customers and their details are shown:

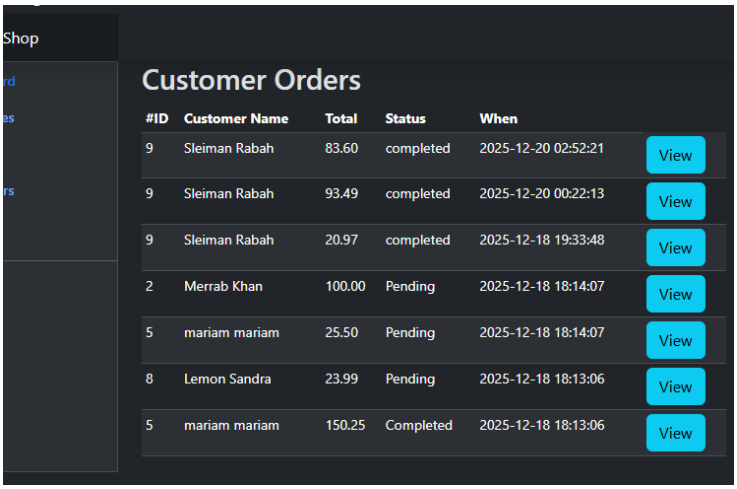


Click on “View” if you want more information about the customer.



11 – Orders page

When you click “Orders” in the navigation bar, you get to the orders summary page. All the orders and their details are shown, ordered by most recent:



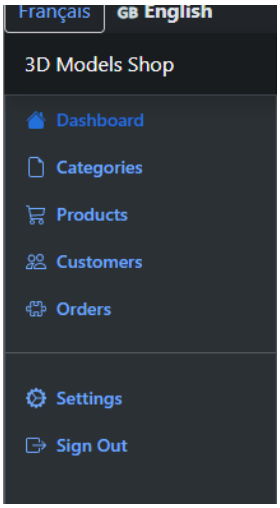
If you click “View”, you get directed to the customer’s summary page and their orders

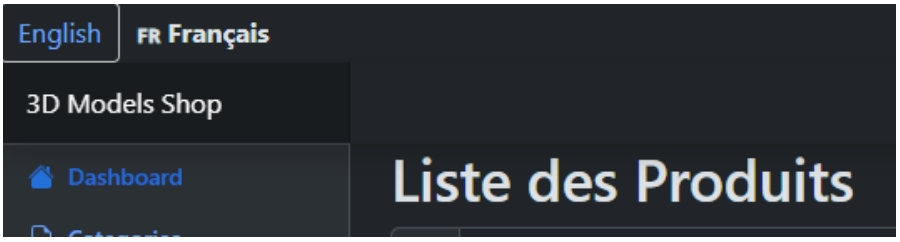
12 - Settings Page

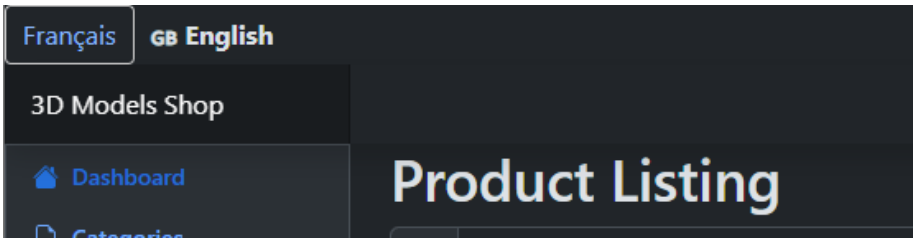
If you click on the settings page in the admin panel, you get to the 2-factor authorization setup, which adds extra security to your account. You can disable or enable the 2fa setup upon clicking on the button disable/enable button.

13 – Logout

You can logout by pressing the “Sign out" button.



14 – Internalization




You can switch between French and English.
